

Have Your Say

The proposed residential development will deliver a range of benefits, including much-needed new homes to meet local demand. A diverse mix of housing is proposed, catering for first-time buyers and families, with half of the proposed homes being affordable.

The scheme also supports local sustainability goals, featuring energy-efficient homes, enhanced biodiversity, and measures to encourage active leisure. Through high-quality design, the development will create a vibrant, resilient and attractive neighbourhood, generating economic opportunities during construction and supporting local businesses through increased demand for goods and services.

Miller Homes and its team thank you for visiting the online exhibition. Following the close of the exhibition on Sunday 30th November 2025 the team will review all feedback as part of the ongoing development process.
